

## Green Championship

Dear All,

I am so happy once again to be able to write to all of you regarding our competition for Green Championship of South East Asia. It is indeed a privilege to stand up to care for the environment. The greatest gift we can give to the world is Life. If we can help others to live we are true champions. The human beings and all animals and plants need air, water and nourishment. Our work can ensure that all living beings will have clean air, water and nourishment to take in. We need economic development too, without economic development we will not be able to buy what we require to live, such as food, clothing, transport, medicine etc. Our wisdom is to ensure that the economic development will not pollute the air, water and food. So the championship is all about how our research, our work, our projects can contribute to sustainable development through protection of the environment. I request all of you to register for the championship, either alone or with one or more partners. Don't ever think that your work is not relevant, because you can make it relevant. I am attaching a booklet, which I have written on the Green Scouts Movement of Fiji. Read, understand and draw up a project within an institution such as a school, university, religious institution, industry, commercial sector or within a community. Be creative, be Bold and Be Committed,

Register now to take part in the Green Championship of South East Asia,

Your Action will serve Billions of people alive today and many more to be born in the future,

Thank you on behalf of them all,

*Ajantha*
